

AIHOME PRACTICAL ASSESSMENT: CONTENT & PUBLISHING STRATEGY

Candidate: Van Nghi Nguyen

Role: AI-Augmented Growth Machine

Objective: Deliver 6 conversion-driven, AI-native short-form video strategies for Aqara MagicPad S1 Plus & Narwal Freo 2.

DATA GATHERING

This submission presents six high-converting, AI-native short-form video strategies engineered specifically for Aihome. Optimized for Malaysia's M40 demographic (60% male, 40% female, ages 27–45, white-collar professionals), every strategy translates localized behaviors, realistic pain points, and product USPs into conversion-driven creative concepts.

By deploying an agentic AI workflow, official company data and product specifications were injected directly into the content generation pipeline. This ensured 100% brand accuracy, accelerated execution within the 48-hour window, and eliminated creative bottlenecks. The ultimate goal of each script is not to chase vanity metrics, but to capture high-intent attention and drive immediate traffic to Aihome's e-commerce storefronts.

PART 1: AGENTIC WORKFLOW & SYSTEM ARCHITECTURE

To achieve high-velocity output without sacrificing brand integrity or cultural resonance, these scripts were not drafted manually from scratch. Instead, I engineered a dual-agent AI architecture—a primary Content Writer Agent and a specialized SEO & Distribution Agent. Below is the strict 5-phase execution logic utilized to train, constrain, and operate this system:

- **Phase 1 (Multi-Pillar Ideation):** Prompted the Content Agent to rapidly generate 10 diverse, fast-paced conceptual frameworks based on four core strategic pillars (Problem-Solution, ASMR, Trend-Jacking, and POV).
- **Phase 2 (Human-in-the-Loop Curation):** I personally audited the AI's 10 generated ideas, hand-selecting the top 3 highest-converting concepts for each product based on local market viability.
- **Phase 3 (PAS Structuring & Cross-Checking):** Instructed the Agent to expand the curated ideas into detailed Markdown production tables using the PAS (Problem-Agitation-Solution) psychological framework. I then executed a strict cross-check command to force synchronization between the AI-Visual, Text in Video, and Voice-over columns—eliminating redundancies and ensuring perfectly timed execution.
- **Phase 4 (Workflow Viability Optimization):** Manually audited the AI-suggested visual tech stacks. I corrected over-engineered workflows (e.g., replacing hallucinated AI app interfaces with real-world screen recordings) to guarantee practical, 48-hour production viability.

- **Phase 5 (Multi-Agent Distribution Pipeline):** Rather than relying on a single monolithic prompt, I deployed a secondary, specialized SEO & Distribution Agent. While the Content Agent focused strictly on pacing and PAS psychology, this secondary Agent audited the finalized scripts to engineer platform-specific SEO copywriting (exploiting TikTok, IG Reels, and YT Shorts algorithms) and strategic hashtag hijacking frameworks tailored for the Malaysian market.

PART 2: VIDEO STRATEGIES

PRODUCT 1: AQARA MAGICPAD S1 PLUS

SCRIPT 1: THE "ONE-TAP GOODBYE" FLEX

1. Content Style & Visual Direction

- **Video Format:** Problem-Solution / Relatable POV.
- **Visual Style:** High-paced, chaotic POV transitioning to a sleek, tech-chic aesthetic. The exact AI visual tech stack and workflow are structured as follows:
 - **Scene 1 & 2 (POV Generation):** The backgrounds and the hand/arm elements will be generated separately using Banana Nano, then composited together to dictate the exact action. I will create precise start (front-end) and end (back-end) keyframes to ensure every scene cuts perfectly to the beat. Kling AI will then generate the video motion by locking these predefined start and end frames.
 - **Audio Integration:** Since this is a POV format, the voice-over can be easily integrated via direct voice recording or CapCut AI voice, assembled with the generated visuals.
 - **Product Scenes:** Official stock footage will be prioritized. If custom creation is required, a detailed product image displaying the exact "Goodbye" UI will be composited with an action shot of a hand pressing the button.
 - **Ending Sequence:** The video will conclude with a wide background shot of all lights powering down, seamlessly transitioning into a POV shot of leaving the condo.

2. The Complete Script (Conversion-Driven)

[0–3s] THE HOOK

Visual: Fast-paced POV montage: frantic wrist checking, snatching car keys off a table, and grabbing the condo door handle.

Voice-over: "Running late for work every single morning, kan?"

[3–10s] BODY – SCENE 1

Visual: Medium shot of a stressed guy jogging through his living room, frantically flicking off multiple old wall switches as he passes them.

Voice-over: “Running around like crazy just to turn off every switch in your condo before leaving the house. So leceh, wei.”

[10–18s] BODY – SCENE 2

Visual: Macro close-up of the sleek Aqara MagicPad S1 Plus screen. A finger enters the frame and taps the digital “Goodbye” scene button.

Voice-over: “Stop the madness, boss. Just use the Aqara MagicPad S1 Plus. Set up your custom scenes on these six wireless buttons...”

[18–35s] BODY – SCENE 3

Visual: Dynamic split-screen synced perfectly to the voice-over. Left: AC louver closes. Top right: living room lights dim to black. Bottom right: robot vacuum undocks and moves forward.

Voice-over: “...with just one tap on ‘Goodbye,’ the AC instantly turns off, all the lights shut down, and your robot vacuum gets to work.”

[35–55s] BODY – SCENE 4

Visual: Tracking shot from behind as the guy calmly walks out the front door, adjusting his jacket with a relaxed posture.

Voice-over: “And just like that, you’ve saved a ton of time. No more morning panic, and no more wondering if you forgot to turn off the AC, lah.”

[55–60s] CALL TO ACTION (CTA)

Visual: Low-angle hero shot of the MagicPad S1 Plus glowing softly on the wall. A yellow shopping cart icon pops up with an RM discount tag.

Voice-over (TikTok): “Save time every morning. Grab yours from the Yellow Basket below!”

Voice-over (IG/YT): “Save time every morning. Grab yours via the Link in Bio!”

3. Cross-Platform Publishing & Optimization Strategy

- **Target Platforms:** TikTok for fast-paced relatability driving impulse clicks, IG Reels focusing on the aesthetic upgrade to the condo, and YT Shorts for users searching for smart home morning routines.

- **SEO Copywriting (Caption):**

- **TikTok:** Running late again? 🚗💨 Stop the morning panic! One tap on the Aqara MagicPad S1 Plus shuts everything down. Save time & tap the Yellow Basket now, boss! 🟡
- **IG Reels:** Elevate your morning routine. ☕ The Aqara MagicPad S1 Plus is the ultimate aesthetic upgrade for your condo. One tap turns off all lights and ACs so you can leave stress-free. Upgrade your home via the Link in Bio! ✨
- **YT Shorts:** How to Automate Your Morning Routine with Aqara MagicPad S1 Plus. One-tap smart home central control panel for lights, AC, and robot vacuums. Drop your questions in the comments!

- **Tagging Strategy:**

- **Trend-Hijacking:** #CondoLivingKL #SmartHomeMalaysia #MorningRoutineMY
- **Product-Specific:** #AqaraMagicPad #AihomeMalaysia #AqaraMalaysia

SCRIPT 2: THE "UNIFI DOWN" FLEX

1. Content Style & Visual Direction

- **Video Format:** Aggressive Hook-Drop / Contrarian Problem-Solution.
- **Visual Style:** Dramatic lighting contrast driven by a highly specific character and environment generation workflow. The exact AI visual tech stack is structured as follows:
 - **Character Generation:** Use Banana Nano to generate the character assets: a young Chinese-Malaysian couple (neighbors, approx. 25-26 years old) and the main protagonist (a Malaysian male, approx. 30 years old).
 - **Environment Generation:** Utilize ChatGPT Image 2.0 to create two contrasting background environments from an exterior window perspective (looking into the living room): Scene A features a dark, powerless room with a red-blinking Wi-Fi router; Scene B features the exact same condo perfectly illuminated, while the router remains red.
 - **Compositing & Keyframing:** Composite the generated characters into the ChatGPT backgrounds using Banana Nano to establish precise start (front-end) and end (back-end) keyframes for the visual scenes.
 - **Audio Integration:** Utilize ElevenLabs for Voice-over generation via Text-to-Speech. A custom voice model will be trained/cloned beforehand to ensure an authentic, localized Malaysian accent.
 - **Product Scenes:** Official stock footage and high-quality B-roll will be used exclusively for macro and close-up product shots to maintain absolute brand accuracy.

2. The Complete Script (Conversion-Driven)

[0–3s] THE HOOK

Visual: Extreme macro close-up of a Wi-Fi router with a blinking red “LOS” light. Fast cut to a frustrated wife gesturing at the dark living room.

Voice-over – Neighbour's Wife: “I told you already—why buy all this stuff just to waste electricity? Now the internet's down and nothing even works, wei!”

[3–10s] BODY COPY – SCENE 1

Visual: Cut to the main character next door snapping his fingers confidently. The dark room instantly lights up perfectly. He smirks at the camera.

Voice-over – Main Character: “Smart home becomes dumb home when Wi-Fi is down, right? Not this one, boss.”

[10–18s] BODY – SCENE 2

Visual: Smooth close-up of the MagicPad S1 Plus. A clean 3D graphic overlay highlights the “Zigbee 3.0 Hub” icon glowing inside the panel.

Voice-over: “The Aqara MagicPad S1 Plus comes with a built-in Zigbee 3.0 Hub.”

[18–35s] BODY – SCENE 3

Visual: B-roll sequence: The router is clearly unplugged with the red light off, but the motorized curtains glide open smoothly and the ambient lights dim in perfect sync with the voice-over.

Voice-over: “It processes your automations locally. That means your lights and curtains still work flawlessly, with zero lag...”

[35–55s] BODY – SCENE 4

Visual: The guy relaxes on the sofa, casually scrolling on his phone, completely unbothered by the dead router sitting in the background.

Voice-over: “...even when the internet goes down. Ultimate peace of mind, kan?”

[55–60s] CALL TO ACTION (CTA)

Visual: POV shot of a certified technician in an Aihome uniform finishing the panel installation on a wall. A “Certified Installers” badge pops up.

Voice-over – TikTok: “Future-proof your condo today. Click the Yellow Basket for certified installation!”

Voice-over – IG/YT: “Future-proof your condo today. Click the Link in Bio for certified installation!”

3. Cross-Platform Publishing & Optimization Strategy

- **Target Platforms:** TikTok to trigger frustration with relatable Unifi outages, IG Reels for tech-savvy homeowners wanting reliable aesthetic setups, and YT Shorts targeting local smart home hub technical searches.
- **SEO Copywriting (Caption):**
 - **TikTok:** Unifi down again? 😡 Don't let your smart home become dumb! The Aqara MagicPad S1 Plus has a built-in Zigbee 3.0 Hub for zero lag. Future-proof your condo at the Yellow Basket, boss! 🛠️
 - **IG Reels:** No internet? No problem. 🖱️ The Aqara MagicPad S1 Plus processes automations locally with its Zigbee 3.0 Hub. Keep your condo running flawlessly and keep the wife happy. Click the Link in Bio for certified installation! 💡
 - **YT Shorts:** Aqara MagicPad S1 Plus Local Automation Test: What Happens When Wi-Fi Goes Down? Built-in Zigbee 3.0 Hub explained. Let us know your thoughts below!
- **Tagging Strategy:**
 - **Trend-Hijacking:** #TechBroMY #SmartHomeHacks #UnifiDown
 - **Product-Specific:** #AqaraMagicPad #AihomeMalaysia #AqaraMalaysia

SCRIPT 3: THE DELIVERY GUY INTERROGATION

1. Content Style & Visual Direction

- **Video Format:** Relatable Skit / Problem-Solution.
- **Visual Style:** A messy, realistic kitchen aesthetic contrasting with clean, modern UI close-ups, driven by a precise compositing workflow. The exact AI visual tech stack is structured as follows:
 - **Character Generation:** Use Banana Nano to generate the core character assets: an Asian mother (approx. 50 years old) with flour-covered hands, and a Grab delivery rider carrying a parcel.
 - **Environment Generation:** Utilize ChatGPT Image 2.0 to create two distinct backgrounds: a messy, flour-covered kitchen with an Aqara MagicPad S1 Plus mounted on the wall, and a front door exterior view (POV from inside looking out).
 - **Compositing & Keyframing:** Composite the mother into the kitchen scene and the delivery rider into the front door scene using Banana Nano, establishing precise start (front-end) and end (back-end) keyframes.

- **UI Simulation:** Use Banana Nano to seamlessly composite the generated image of the delivery rider outside the door directly into the UI of the Aqara MagicPad S1 Plus product footage, simulating a live video feed.
- **Audio Integration:** Generate the Voice-over (VO) using ElevenLabs Text-to-Speech, applying a custom-trained Malaysian voice model for an authentic local accent.
- **Product Scenes:** Official stock footage and high-quality B-roll will be used for all macro and close-up product shots.

2. The Complete Script (Conversion-Driven)

[0–3s] THE HOOK

Visual: A mother is busy kneading dough in the kitchen. Suddenly, a loud doorbell rings. She looks up, stressed, and shouts in frustration.

Voice-over: “Aiyo, who is it this time?!”

[3–10s] BODY COPY – SCENE 1

Visual: POV shot looking down at flour-covered hands, followed by a frantic panning look across the empty kitchen counter for a missing smartphone.

Voice-over: “Eh? My phone was just here eh... where did I put ah?”

[10–18s] BODY COPY – SCENE 2

Visual: The mother looks up, relieved. Fast cut to a close-up of the MagicPad S1 Plus screen turning on, immediately displaying a live video feed of the delivery rider.

Voice-over: “Ah, wait! My son just buy this new one, so simple.”

[18–28s] BODY COPY – SCENE 3

Visual: Macro shot of the MagicPad S1 Plus bezel. Clean, futuristic sound-wave graphics pulse out from the panel's built-in mic area, showing hands-free interaction is active.

Voice-over: “With the 4-mic array and 2-way audio, you just talk straight to the panel.”

[28–55s] BODY COPY – SCENE 4

Visual: Split-screen. Left: the mother happily goes back to kneading dough, speaking towards the hallway. Right: the delivery rider nods and places the parcel safely outside the door.

Voice-over: “Abang, just leave it there lah! Easy, right?”

[55–60s] CALL TO ACTION (CTA)

Visual: Clean aesthetic shot of the MagicPad S1 Plus mounted beside a secure front door. A “24-Month Warranty” badge flashes on screen.

Voice-over – TikTok: “Make mum's life easier. Grab it from the Yellow Basket now!”

Voice-over – IG/YT: “Make mum's life easier. Get yours via the Link in Bio!”

3. Cross-Platform Publishing & Optimization Strategy

- **Target Platforms:** TikTok for engaging the busy parent/M40 demographic, IG Reels emphasizing the convenience and family-friendly home upgrade, and YT Shorts capturing searches for smart intercoms.
- **SEO Copywriting (Caption):**
 - **TikTok:** Hands messy but Shopee delivery is here? Aiyo! 📦 Talk straight to the rider with the Aqara MagicPad 2-way audio. Make mum's life easier and tap the Yellow Basket now! 🎤
 - **IG Reels:** Upgrade your family's condo with the ultimate convenience. 🏠 The Aqara MagicPad S1 Plus features a 6.9" screen and hands-free 2-way audio. Perfect for busy moments. Get yours via the Link in Bio! 📱
 - **YT Shorts:** Aqara MagicPad S1 Plus 2-Way Audio Intercom Demo. The best smart home control panel for busy families. Ask us about installation in the comments!
- **Tagging Strategy:**
 - **Trend-Hijacking:** #ShopeeHaulMY #MalaysianMoms #CondoLivingKL
 - **Product-Specific:** #AqaraMagicPad #AhomeMalaysia #AqaraMalaysia

PRODUCT 2: NARWAL FREO 2 (NARWAL FLOW 2)

SCRIPT 4: THE SNEAKY PET HAIR HACK

1. Content Style & Visual Direction

- **Video Format:** Aggressive Hook-Drop / Problem-Solution.

- **Visual Style:** Fast-paced, high-velocity macro shots and 3D cross-sections driven by a precise character and background generation workflow. The exact AI visual tech stack is structured as follows:
 - **Environment Generation:** Utilize ChatGPT Image 2.0 to generate base background assets (e.g., dark rug, condo living room, front door hallway).
 - **Character & Pet Generation:** Use Banana Nano to generate the core assets: the white cat and the Malaysian male character.
 - **Compositing & Keyframing:** Use Banana Nano to composite the characters and pets into the ChatGPT backgrounds. Precise start (front-end) and end (back-end) keyframes will be established to simulate motion (e.g., sweeping the floor, cat shaking fur).
 - **Audio Integration:** Generate the Voice-over (VO) using ElevenLabs Text-to-Speech, applying a custom-trained Malaysian voice model for an authentic local accent. Assemble with CapCut for glitch effects, heavy bass drops, and dynamic pacing.
 - **Product Scenes:** Official stock footage and high-quality B-roll will be used strictly for the Narwal Freo 2 and the macro 3D cross-section of the DualFlow Zero-Tangling System to ensure absolute mechanical accuracy.

2. The Complete Script (Conversion-Driven)

[0–3s] THE HOOK

Visual: Low-angle tracking shot of a white cat sprinting across a dark rug, leaving a literal “cloud” of fur floating behind.

Voice-over: “Aiyo, it’s a nightmare wei. Why the furry tornado everywhere”

[4–12s] BODY – SCENE 1: THE AGITATION

Visual: At 4.0s, insert a screen glitch and heavy bass drop. POV shot of a guy sweeping the floor manually, looking defeated. The cat walks by, shakes its fur, and more hair falls off immediately.

Voice-over: “You sweep every single morning, but by evening? Still fur everywhere. It’s an endless cycle, boss.”

[12–22s] BODY – SCENE 2: THE TECH SOLUTION

Visual: Macro 3D cross-section of the Narwal Freo 2’s base. The DualFlow Zero-Tangling System “swallows” massive clumps of cat hair without wrapping.

Voice-over: “Enter the Narwal Freo 2. Its DualFlow Zero-Tangling System swallows fur whole, so nothing gets stuck.”

[22–30s] BODY – SCENE 3: WAF & ROI BENEFITS

Visual: Wide shot of the cat sleeping peacefully on the rug while the Freo 2 glides quietly behind.

Voice-over: “100% hands-free. No more fur flying around. The floor is spotless, and you save hours every week.”

[30–40s] BODY – SCENE 4

Visual: Tracking shot of the guy walking out the door looking sharp while the cat sleeps on the sofa.

Voice-over: “Your house is always guest-ready, and you? Always looking sharp.”

[41–45s] CALL TO ACTION (CTA)

Visual: Split screen: a lint roller is thrown in the trash on one side, while a checkout screen appears on the other.

Voice-over – TikTok: “Ditch the lint rollers, boss. Tap Yellow Basket to grab yours!”

Voice-over – IG/YT: “Ditch the lint rollers, boss. Link in bio to grab yours!”

3. Cross-Platform Publishing & Optimization Strategy

- **Target Platforms:** TikTok for highly visual pet hair problem-solving, IG Reels for aesthetic pet-friendly home vibes, and YT Shorts for users searching for the best robot vacuums for pet hair.
- **SEO Copywriting (Caption):**
 - **TikTok:** Love the fur baby but hate the fur? 🐾 Ditch the scissors and lint rollers! Narwal Freo 2's Zero-Tangling System handles it 100% hands-free. Grab yours at the Yellow Basket today, boss! 🛒
 - **IG Reels:** Keep your condo spotless and guest-ready, even with pets. 🐾 The Narwal Freo 2 features a DualFlow Zero-Tangling System for zero maintenance. Maximum Wife Approval Factor. Check the link in bio! ✨
 - **YT Shorts:** Narwal Freo 2 Pet Hair Test: DualFlow Zero-Tangling System in Action. Best robot vacuum for dogs and cats. What pet do you have? Comment below!
- **Tagging Strategy:**
 - **Trend-Hijacking:** #PetsOfTikTokMY #CleaningHacksMY #CondoLivingKL
 - **Product-Specific:** #NarwalFreo2 #AihomeMalaysia #NarwalMalaysia

SCRIPT 5: THE "SHE'S COMING HOME" PANIC

1. Content Style & Visual Direction

- **Video Format:** High-Stakes Storytelling / Problem-Solution.
- **Visual Style:** Frantic split-screens transitioning to highly satisfying macro cleaning shots, driven by a precise character and background generation workflow. The exact AI visual tech stack is structured as follows:
 - **Environment Generation:** Utilize ChatGPT Image 2.0 to generate base background assets (e.g., messy greasy kitchen, clean condo entryway).
 - **Character Generation:** Use Banana Nano to generate the core character assets: the panicked husband and the amazed wife.
 - **Compositing & Keyframing:** Composite the characters into the ChatGPT backgrounds using Banana Nano. Establish precise start (front-end) and end (back-end) keyframes to simulate frantic motion (e.g., slipping on ketchup, running blur, subtle kicking).
 - **Audio Integration:** Generate the Voice-over (VO) using ElevenLabs Text-to-Speech, applying a custom-trained Malaysian voice model for an authentic local accent. Assemble with CapCut for comedy sound effects (slip, record scratch) and pacing.
 - **Product & UI Scenes:** Real screen recordings will be used for the Narwal App UI. Official stock footage and high-quality B-roll will be used strictly for the Narwal Freo 2 deploying, the FlowWash scrubbing action, and the base station interior to ensure 100% brand and mechanical accuracy.

2. The Complete Script (Conversion-Driven)

[0–5s] THE HOOK

Visual: Rapid split-screen. Top: Text bubble “Home in 30 mins”. Bottom: Husband staring in horror at a completely trashed, greasy kitchen.

Voice-over: “Wife texted: Home in 30 mins. Mati lah! The house is a total disaster.”

[5–18s] BODY COPY – SCENE 1

Visual: Husband frantically wiping the counter, checks his watch (20 mins gone!). He tries to run but slips comically on a dried ketchup stain on the floor.

Voice-over: “I tried to clean myself. 20 minutes gone liao! Then I slipped on yesterday's ketchup. Aiyo, 5 mins left!”

[18–30s] BODY COPY – SCENE 2

Visual: Husband on the floor, frantically tapping his phone. Fast cut to the Narwal Freo 2 deploying and its FlowWash Track Mop aggressively scrubbing the ketchup stain.

Voice-over: “No time to mop, wei. I opened the app and deployed the Freo 2. Its FlowWash Track Mop scrubbed that ketchup like a boss.”

[30–45s] BODY COPY – SCENE 3

Visual: Husband runs off to the shower in a blur. Cut to the base station internally washing the mop track with steaming hot water, perfectly clean.

Voice-over: “I ran to shower. Meanwhile, the base station uses hot water to auto-wash the mop. 100% hands-free memang bagus”

[45–52s] BODY COPY – SCENE 4

Visual: Husband walks out looking fresh just as wife opens the door. She smiles: “Wow, honey!” He smiles proudly. Suddenly, the Freo 2 glides past; he subtly kicks it out of sight.

Voice-over: “She walked in: ‘Wow, you cleaned so well, honey!’ My secret helper almost got exposed!”

[52–60s] CALL TO ACTION (CTA)

Visual: High-quality official product beauty shot of the Narwal Freo 2 with a glowing call-out box pointing down to the CTA element.

Voice-over – TikTok: “Be the boss of the house. Tap the Yellow Basket to save RM1,200 now, boss!”

Voice-over – IG/YT: “Be the boss of the house. Hit the link in bio to save RM1,200 now, boss!”

3. Cross-Platform Publishing & Optimization Strategy

- **Target Platforms:** TikTok for high-stakes, comedic storytelling that drives urgency, IG Reels highlighting the pristine cleaning results and Wife Approval Factor, and YT Shorts targeting smart mopping performance searches.
- **SEO Copywriting (Caption):**
 - **TikTok:** Wife coming home to a messy kitchen? Mati lah! 🤖 Send the Narwal Freo 2 to scrub the grease with 100% hands-free auto-wash. Save your marriage & save RM1,200 at the Yellow Basket! 🛒
 - **IG Reels:** Achieve maximum Wife Approval Factor. 💍 The Narwal Freo 2 tackles stubborn kitchen grease with its FlowWash Track Mop and cleans itself with hot water. Hit the link in bio to save RM1,200 now! 🏠

- **YT Shorts:** Narwal Freo 2 FlowWash Track Mop & Auto Hot Water Washing Test. The ultimate robot vacuum for sticky floors. Drop your questions in the comments!

- **Tagging Strategy:**

- **Trend-Hijacking:** #HusbandWifeComedy #CleanTokMY #TechBroMY
- **Product-Specific:** #NarwalFreo2 #AihomeMalaysia #NarwalMalaysia

SCRIPT 6: THE LAZY GENIUS SETUP

1. Content Style & Visual Direction

- **Video Format:** POV / Aesthetic High-Tech.
- **Visual Style:** Premium, relaxed lifestyle aesthetic with smooth, cinematic tracking shots. AI visual tech stack: Midjourney and Stable Diffusion for luxury condo assets, Runway Gen-3 and Luma Dream Machine for smooth forward walks and robot deployment, CapCut for beat-synced jump cuts and ambient sunset lighting.

2. The Complete Script (Conversion-Driven)

[0–3s] THE HOOK

Visual: Over-the-shoulder POV of a guy on a premium leather sofa, tapping his smartphone once. The Narwal Freo 2 deploys in the blurred background.

Voice-over: “Why you work so hard when your condo can clean itself, just chill lah”

[3–15s] BODY – SCENE 1

Visual: Split screen: Left side shows a stressed guy in an office cubicle. Right side shows the Narwal Freo 2 vacuuming his apartment.

Voice-over: “You’re stuck in traffic or doing OT at the office, just chill lah”

[15–28s] BODY – SCENE 2

Visual: Close-up of the smartphone app showing a laser-mapped floor plan of a condo, with a finger selecting a specific room.

Voice-over: “Enter the Narwal Freo 2. With TwinAI obstacle avoidance, you map your apartment right from your phone.”

[28–42s] BODY – SCENE 3

Visual: Fast-paced montage: Narwal Freo 2 vacuuming a rug, mopping tile, then returning to the base station for 100% hands-free auto-drying.

Voice-over: “Schedule a targeted clean from your desk. It vacuums, mops, and auto-dries completely hands-free.”

[42–55s] BODY – SCENE 4

Visual: POV opening the front door to a spotless, gleaming apartment at sunset. The guy kicks off his shoes and sighs in relief.

Voice-over: “By the time you open your door, ting ting, clean.”

[55–60s] CALL TO ACTION (CTA)

Visual: Bold text overlay flashing over the sleek base station, with a glowing CTA button.

Voice-over – TikTok: “Make your life more chill lah. Tap the Yellow Basket to grab your 2% Cashback!”

Voice-over – IG/YT: “Make your life more chill lah. Check the link in bio for your 2% Cashback!”

3. Cross-Platform Publishing & Optimization Strategy

- **Target Platforms:** TikTok for the "lazy hack" appeal to overworked professionals, IG Reels for the aspirational clean-home-after-work aesthetic, and YT Shorts for obstacle avoidance and app control searches.
- **SEO Copywriting (Caption):**
 - **TikTok:** Working late again? 🏢 Don't do chores when you get home! Let Narwal Freo 2 vacuum, mop & auto-dry while you're at the office. Tap the Yellow Basket to grab your 2% Cashback! 💰
 - **IG Reels:** The ultimate time-hack for busy professionals. 🏠 Come home to a spotless condo every day. The Narwal Freo 2 uses TwinAI to clean while you work. Check the link in bio for your 2% Cashback! 🧹
 - **YT Shorts:** Narwal Freo 2 TwinAI Obstacle Avoidance & App Control. How to schedule your robot vacuum while at work. Let us know your thoughts in the comments!
- **Tagging Strategy:**
 - **Trend-Hijacking:** #CorporateLifeMY #SmartHomeMalaysia #CondoLivingKL
 - **Product-Specific:** #NarwalFreo2 #AihomeMalaysia #NarwalMalaysia
